n8n Workflow Automation | AI Model Integration (Gemini/Claude) | Supabase & API Integrations
AI Automation Specialist

Professional Summary

AI Automation Specialist with over 4 years of experience designing, building, and deploying intelligent workflow automations across education, fitness, and service-based business operations. Proficient in n8n, Make, and Zapier, with hands-on integration of AI models (Gemini, OpenAI, Claude) for classification, content generation, and conversational handling. Experienced connecting automations to cloud databases (Supabase, Airtable, PostgreSQL) and channels including WhatsApp, email, and voice. Skilled in mapping business processes, identifying automation opportunities, and taking projects from concept to live production. Demonstrated ability to troubleshoot, debug, and maintain multi-workflow systems while documenting processes for clear handoff.

Key Achievements

- Delivered 15+ end-to-end automation projects across education, healthcare, fitness, and customer service sectors, taking each from process mapping and design through to live production deployment
- Reduced manual operational workload by 60–90% across multiple client systems by replacing repetitive tasks (inquiry handling, inbox triage, scheduling, follow-ups) with AI-driven n8n workflows
- Integrated Google Gemini, OpenAI, and Claude models into production pipelines for classification, conversational handling, and content generation, including a 5-category AI triage system for patient message routing
- Built and maintained multi-workflow systems (up to 8 interconnected workflows) for a single platform, coordinating state tracking, error handling, and cross-team handoff documentation
- Resolved recurring integration challenges across the stack – including Supabase schema/credential issues, Gemini embedding model deprecations, and unreliable structured LLM outputs – through systematic debugging

Areas of Expertise

- Workflow Automation & Process Mapping (n8n, Make, Zapier)
- AI/LLM Integration for Classification, Content Generation & Conversational Handling
- API & Webhook-Based System Architecture
- Cloud Database Management (Supabase, Airtable, PostgreSQL)
- End-to-End Project Delivery: Concept to Production

Technical Skills

- Automation Platforms:** n8n, Make (Integromat), Zapier
- AI & LLM Integration:** OpenAI API, Gemini API, Claude, Prompt Engineering, RAG Systems, Pinecone
- Voice & Conversational AI:** Voiceflow, ElevenLabs, Vapi, Retell
- Programming:** Python (basic), JavaScript (basic), Bash scripting
- APIs & Integration:** REST APIs, Webhooks, OAuth2, JSON
- Databases & Storage:** Supabase, Airtable, PostgreSQL, Google Sheets
- Business Tools:** CRM Automation, Lead Nurturing Workflows, Appointment Booking Systems

Work Experience

AI Automation Specialist

Freelance / Self-Employed

Remote

Jan 2022 – Present

- Designed and built a RAG-powered WhatsApp chatbot using n8n, Google Gemini, Pinecone, and Twilio, automating FAQ handling and reducing manual inquiry response time by an estimated 90% while maintaining 24/7 coverage
- Architected an 8-workflow end-to-end automation system for an AI-driven exam prep platform (JAMB/WAEC/NECO), integrating Supabase and Gemini to automate daily lesson delivery, mock exams, and parent reporting for 100+ student enrollments
- Built a 6-workflow clinic automation pipeline using n8n, Supabase, Twilio, and Gemini, deploying an AI triage classifier that automatically sorted patient messages into 5 urgency categories, cutting manual message handling by roughly 80%

- Developed an AI voice concierge integrating Vapi, GPT-4.1, and Deepgram, resolving structured-output reliability issues by migrating to native structured outputs and achieving consistent, error-free response parsing
- Implemented an automated appointment booking workflow with n8n and Calendly, eliminating manual scheduling back-and-forth and reducing staff coordination time by an estimated 5+ hours per week
- Created a WhatsApp and email customer support automation that auto-resolved common inquiries, reducing manual inbox management workload by approximately 60%

Education

University of Nigeria, Nsukka

B.Sc. Computer Science – Second Class Honours

Certifications

- AI Automation Certification – TS Academy, 2024
- Zapier Certification, 2023
- Make.com Certification, 2023
